

Hiring Maintenance Companies to Perform the Annual Function Check

If you are either unable or unwilling to carry out the regular maintenance work to ensure the operational readiness of the smoke detectors yourself, you also have the option of hiring a third party to perform this service. If you hire a professional service provider that provides a record for you that all technical and legal obligations to ensure operational readiness of the smoke detectors have been properly fulfilled, then you can be assured and prove that you have done all that is required.

In light of this – and excluding all liability – we have listed two potential service providers for you on this form that you can hire to perform the maintenance work to ensure operational readiness of the smoke detectors. Naturally, you are free to hire another provider of your choice. If so, there is a sample text on the back that you can use for hiring.

Please note that you are hiring the companies yourself and also need to bear the costs that are incurred by this.

Please hire the selected company yourself at your own expense!

Company
Pyrex GmbH

Flat rate of 29.95 euros (including sales tax)

Hiring:

1. Contact pyrex.com/pro via PC or smartphone.
2. Register and enter maintenance information (only necessary when booking the first time).
3. Book the maintenance; Pyrex will contact you by phone for scheduling.

Note:

Prepayment is necessary; for this reason, booking by phone is NOT possible. Hiring can only be done online as described above.

Company
degewo Technische Dienste GmbH

Flat rate of 40.79 euros (including sales tax)
